What You Want to Know About Your Auto and How To Drive It and Keep It

Expert Advice How to Keep Automobiles Running Smoothly and the Best Way to Remedy Machine Troubles-Traffic Suggestions and Pleasure Routes for Evening World Readers.

By GEORGE H. ROBERTSON.

HERE is a section in the Police Department traffic regulations which provides that pedestrians should avoic interference with traffic, and to this end should not step from the sidewalk without first looking to see what is ap-

serve the traffic in both directions. A strict observance of these rules will prevent many unfortunate ac-

One of these unfortunate accidents occurred the other day at ing Sherwood Magee, Hans Lobert, Abingdon Square, where a police sergeant, riding on the running board of Gabby Cravath, Luderus, Jack Martin, an automobile that was taking him on an emergency call, was killed when the car in which he was riding collided with another. A wet pavement was the cause of this accident. Had the pavement not been wet the driver of the machine would not have lost control. It will only take a few more accidents of this sort to make the proper authorities realize that the wataccidents of this sort to make the proper authorities realize that the wetting of pavements during the day is almost oriminal negligence.

It might be well to bear in mind that there is a regulation of the Police Department providing that a vehicle shall not back to make a turn, if it obstructs traffic, but go around the block or to a street wide or free enough for the purpose. It takes but a short time to go around the block, and by doing this you can get to your destination with ease and safety. Try it a few times and see if it is not the proper idea in traffic travelling.

ANSWERS TO LETTERS.

Alsowookle Editor:

I have a four-cylinder car which starting or oranks very easily when werm, and could, after standing a day or more, it also starts easily when werm, and the standing one-half hour there is constanting to the constanting one-half hour there is constanting to the paints of your spark gluga. After a group of the paints of your spark gluga. After a cannot be painted to the paints of your spark gluga. After a cannot one the meant of plug Poor capturetion might be the cause, but I doubt H.

This freuble might be caused by an undue amount of free cil on the head of the paints of your spark gluga. After a proper your and the paints of your spark gluga. After a proper your and the paints of your spark gluga. After a proper your and your spark gluga for your spark g

Automobile Editor:

I intend buying a motorcycle, but do not understand the mechanism of it very well. Could you auggest a book for me to study?

In FOLKS.

The manufacturer who builds the machine you are buying undoubtedly issues an instruction book showing everything in detail. If not, "Self-Propelled Vehicles" or "The Automobile" can be secured at any good book store.

Is there any clause in the automobile laws of this State permitting one to drive a car without a license?

G. H. SAVAGE.

G. H. SAVAGE.

The motor vehicle laws require a person to have a chauffeur's license who works for hire. A person does not need a license if he is not a paid chauffeur or an employee of the person owning the car. If the owner or licensed chauffeur is with the driver, the driver under these above mentioned conditions does not require a license.

I have a Holsman air-cooled motor No. G 207 and wish to know whether to use a marine carburetor or a high speed motor carburetor. What difference does it make in the use of the erence does it man, above two carburetors?

GEO. HUISS.

I believe that for practical purposes a marine carburetor (or mixing valve) would do just as well on your motor as a high speed carburetor, although you would not get the accurate adjustment by using the marine carburetor.

What is the shortest route from As-bury Park, N. J., to Newark, N. J.? What is the distance? L. B. SMITH. Asbury Park to Long Branch, Sea-bright, Keyport, Parth Amboy, Rah-way, Elizabeth to Newark. The dis-tence is about sixty miles.

Automobile Editor:

Kjndly advise me as to the best route road from New York to New Palts, N. Y., and the best ferry to cross. Would like to take the trip on Columbus Day. Are the roads better on the New York or New Jersey side?

Would recommend that you take the New York side from New York through Yonkers, Tarrytown, Ossining, Peekskill, Garrison to Fishkill Landing, cross ferry there to Newburgh, then through Plattekill to New Palts.

Will you kindly advise me the best route to Kingston, N. Y.? L. J. M.
Leave New York City for Yonkers, Tarrytown, Ossining, Peekskill, Garrison, Wappinger Falls, Poughkeepsie, Hyde Park, Staatsburg, Rhinebeck to Kingston.

son, Wappinger Falls, Poughkeepsie, Hyde Park, Staataburg, Rhinebeck to Kingston.

Automobile Editor:

Could you kindly let me know the best route to take to go to Boston on a walking trip? I ask you because I failed to get any information any where. If you cannot answer the question please let me know where I can find out the walking routes and oblige.

The best walking routes would no.

Lincols, Cincinnati Rayling, Cincinnati Deal Boston.

C. Miller, St. Louis.

Egai, Brooding.

Science, Chicago.

Lianels, Cincinnati Rayling, Cincinnati Deal Boston.

Lianels, Cincinnati Rayling, Cincinnati Deal Boston.

C. Miller, St. Louis.

Mathewayon, New York.

The best walking routes would naturally be the automobile highways. Go from New York to New Rochelle, Stamford, Bridgeport, New Haven, Hartford, Springfield, Worcester to Boston.

National League Pitchers.

Boston.

Automobils Editor:

I have a 1906 De Dietrich car of 40 H. P. I have had a cylinder miss for the past few weeks and have been unable to locate the trouble. I have looked over nearly everything, but can't find out what is wrong.

EDWARD BRONSON.

Would advise you first to examine the ignition. You may have a poor plug that fires all right when out in the open air but that will miss under compression. See that your plug wires are free from short circuits and that the magneto itself is all right, then look over the valves, so that they are timed properly and that there is no loss of compression due to a dirty valve.

John Dutil, who has made a study of fish in local waters for more than forty years, says that it is a peculiar fact that the striped base are caught almost directly in the first undertow. That shows how close striped base love come inahors. Striped base love stirring and swirting water and are usually found, he says, where the sea spumes and froths in a mass of white. Most striped base are taken at night, and the very best time to fish is when the moon is in the first quarter and at the last quarter, for then the tide does not race and the water does not fall so low or get so high. Then it is that fish fed close inshore.

Striped base since our granddaddy's days have gradually been diminishing in size, and no fish in our time dome near to the records of the Cuttyhunk of his favorite quarry."
